Property and Situation Analysis

110 Munson St. New Haven Ct

110 Munson St is a **2.04 Acre** tract in New Haven, Ct. The site sits across the street from the Winchester Lofts adaptive reuse project, and within walking distance of the campus of Yale University. The property is zoned RH-2, allowing for development by right. It is priced firm at \$2M.

A minimum yield on cost of **7.5%** is required for investor confidence.

Parcel

Key Metrics:

Metrics Shape and Alter Property Development

Rent price and apartment sizes were sourced by Yardi Matrix, an apartment database that covers **90%** of the U.S. metro area.

Analysis includes New Haven apartment buildings with **50 or more units**.

Housing composition was sourced from U.S Census Bureau.

["Average Rent in New Haven, CT: 2025 Rent Prices by Neighborhood"](#)

Market rents were calculated on a \$/SF basis and are considered directionally accurate based on available data.

For underwriting simplicity, market rents are used as a baseline and adjusted using recent market comparables.

Average rent in New Haven, CT

Last updated: December 18, 2025

	 Average Rent	 Average Apartment Size
All Rentals	\$2,278	775 sq. ft.
Studio	\$1,844	469 sq. ft.
1 Bed	\$2,190	695 sq. ft.
2 Beds	\$2,537	985 sq. ft.
3 Beds	\$2,889	1,195 sq. ft.

Market Rents:

Studio	~\$4.00
1/1	~\$3.75
2/2	~\$3.25
3/2	~\$3.10
Townhouse	~\$0.50 / SF additional

Comparable Rents: Winchester Lofts

Competition shapes Property Development and Amenities

Winchester Lofts is the largest competing multifamily property in the immediate submarket, located in walking distance to Yale and the central business district.

As of January 2026, a Norwalk based non-profit announced plans to acquire the complex and convert a majority of its units to income-restricted housing.

Under this proposed change, Tenants must qualify at or below 30%, 60%, or 80% area median income, or would have to relocate to the 29 market-rent units

This transition is expected to displace or redirect higher income residents within the Yale-adjacent submarket.

Winchester Lofts current offering of Studios, 1/1 and 2/2 produces a high occupancy percentage of 90.5%. By using these choices and pricing below Winchester Lofts, 110 Munson St is positioned to capture transitioned demand and reduce tenant churn

Winchester Lofts Pricing 275 Winchester Ave, New Haven, CT 06511

Studio: 373 sqft	\$4.57 sqft
1/1: 525 sqft	\$3.68 sqft
2/2: 993 sqft	\$3.10 sqft

Zoning Analysis:

Zone Optimization Allows for Maximum Revenue Generation

110 Munson St. New Haven sits on 2.04 acres with 1.75 acres usable. It is RH-2 classified, permitting a **Floor Area to Lot Ratio** of 2.0 with maximum building coverage of 50%

Net Lot Area:

1.75 Acres * 43,560 (SQFT/Acre) = 76,230 SQFT Total

Maximum Buildable Floor Area:

76,230 SQFT * 2.0 FAR = **152,460** SQFT Maximum Floor Area

Maximum Building Footprint

76,230 SQFT * 0.50 = 38,115 SQFT Maximum Land Area

Maximum Retail/Office Allocation 15%

152,460 SQFT * 15% = **22,869 SQFT Maximum Retail and Office**

A four-story structure fully utilizes the allowed 4-story structure and achieves the maximum permitted FAR of 2.0.

Zoning - City of New Haven Classification RH-2

Density <i>Minimum lot SF per dwelling unit</i>	Unlimited
FAR <i>Floor area to lot size ratio</i>	2.0
Maximum Building Coverage <i>Maximum land area, as fraction of lot size, occupied by the principle building</i>	50%
Height Restriction	50ft/4 storey
Parking Minimum <i>Spaces per dwelling unit</i>	.75
Additional Notes	Ground floor retail and office are permitted, but may not exceed 15% of total SF.

Commercial Potential:

Commercial Rentals are Key Revenue Drivers

Commercial Rental Space is 22,869 SQFT:

Considering common square footage in commercial space, an estimate of 15% for common space is reasonable.

New Haven Average Price per SQFT

According to a New Haven Office Q2 2025 market analysis by Cushman and Wakefield, overall average asking retail rent is \$22.54 dollars per square foot annually. [New Haven Market Stats](#)

Vacancy Rates Differ Between Commercial Types

Office vacancy rates continue to be on the rise: up to 17.7% and a 160 basis point increase YOY.

However, the New Haven Central Business district recorded a decline in vacancy, at the lowest vacancy rate at 8.4%.

By focusing on a larger number of retail rentals then commercial, we can ensure usage and increase foot traffic.

In-Line Store Fit-Out Costs

In Line Store Fit-Out costs average \$155 dollars per square foot nationally.

In our scenario, we can utilize an average value of 170 dollars.

OVERALL AVG ASKING RENT (ALL CLASSES)*	OVERALL AVG ASKING RENT (CLASS A)*
\$22.71	\$23.93
\$19.16	\$23.38
\$18.15	\$20.59
\$22.63	\$23.72
\$21.26	\$21.99
\$20.61	\$20.04
\$21.29	\$22.54

Class A Incentives

- In the New Haven Area, Class A Rental Spaces outperform Class B: 60.7% of tenants inking deals
 - The NNN of 110 Munson St will compose of Class A Developments
- 110 Munson St. New Haven is located in a prime area with high foot traffic from Yale Students and New Haven Community.

Construction Costs and Revenue

- At \$23.00 dollars per square foot and the utilization of longer contracts, 110 Munson St can reduce vacancy
- Construction costs are lower per square foot than family home developments, increasing yield on cost.
- Revenue streams can be anchored by retail and consumer stores eg: Gyms, Grocery, etc.

Quantity and Chosen Mix

- By RH-2, this development is allotted 22,869 SQFT or 15% by right.
- However, NNN development is riskier compared to residential which the vacancy graph depicts.
- Typically, retail and commercial consist of 10-30% of a mixed used development.
- Focusing on the allotted 15% limits risk.

Market Rents and Unit Choices

Market rents are set in comparison with competition

Using comparables with Winchester Lofts, we can alter our Market Rents

By decreasing market rents by **2%**, 110 Munson St can remain competitive within the multi family home market

110 Munson St should emulate the layout of Winchester loft. Focusing on studios, 1/1, and 2/2 ensures that apartment density is maximized to produce the highest revenue yield.

Yale is the largest employer of New Haven and 110 Munson St is positioned to attract the Yale affiliated population.

Studios and 1/1 designs serve as our anchor rentals due to increased rent per SQFT and fastest lease-out time. These appeal to students and the demographics of Yale affiliated individuals.

Market Rents:

Studio	~\$4.47
1/1	~\$3.60
2/2	~\$3.038
Commercial (NNN)	~\$21.00

Implementation: Commercial, Studios, 1/1, 2/2

A Varied Combination allows for a 7.5% Yield on Cost

Proforma and Investment Analysis

This combination is shown below:

Studio: 85 Units
1/1: 90 Units
2/2: 10 Units

This combination maximizes renter density while preventing high turnover rates present in studios.

A 7.52% Yield on cost is met, with a development spread of 2.02% of a typical sale cap of 5.50% in New Haven.

With the projected revenue performance and an typical sale cap at 5.50%, profit at sale is a potential \$18,831,331 after 6-12 months of stabilized occupancy.
