Math Masters: Algebra Adventures

Submit | Sign In

Course Overview:

- This Canvas page includes over 150+ games with over 2320 handmade questions.
- Inspired by the Khan Academy Algebra One format, each of our games are organized into digestible quests.

How to access our Canvas Page:

- Teachers are able to access this page through the Canvas Commons.
- This Course is published as an OER resource and costs no money to download.
- To find this page:
 - Open the Canvas Commons
 - SEARCH MATH MASTERS: ALGEBRA ADVENTURES
 - Look for our logo

Math Masters: *Learn Different, Achieve more: Educator Guide*

Developed by Brandon Nguyen, Enzo Yotsuaye, Jayden Le, Daniel Diedrick, Daniel Jacoby, Daniel Chae, Eric Dewitt, Avi D. Kalley Ye, and Gracie Park

OVERVIEW

This Canvas-based Algebra 1 course combines Khan Academy's lessons with interactive games like Kahoot and Quizizz to gamify learning. The course follows the unit structure of Khan Academy and students engage in quizzes and games to reinforce algebra concepts. Students receive immediate feedback on their performance, and teachers can track progress through student data. The inclusion of gamified elements boosts student motivation, making the process of learning more engaging and ensuring mastery of key Algebra 1 concepts.

GOALS OF THIS DOCUMENT

1. Showcase various Canvas techniques that may be **beneficial** to educators.
2. Highlight the **impact** of these techniques.

SPECIFICATIONS ON BASIC COMMONS USE

We posted our course on the Canvas Commons to share educational resources, collaborate with colleagues, and provide ready-made content for instructors. To post courses on the commons, go into **settings** on the course, press **post to commons**, and hit **submit**. Courses on the commons can be accessed by other teachers and educators through a Canvas teacher account.

COURSE GUIDE

EDUCATOR GUIDE

Educational youth success rate has been struggling since the Covid-19 pandemic

Many youths feel that their traditional school curriculum is disengaging

So, we came up with an idea and brought it to life...

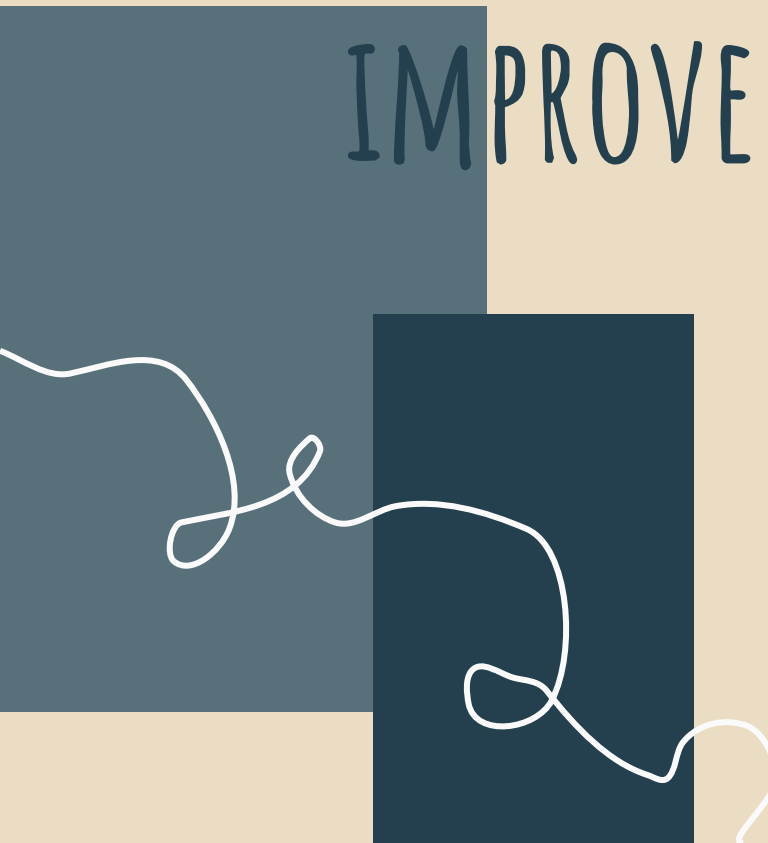

OUR PURPOSE

Through gamifying the curriculum, students are able to stay engaged and motivated as they set goals and practice skills in a fun, interactive way. Math Masters amplifies students' understanding of course concepts, achieving learning objectives more effectively and efficiently.

HOW DOES IT BENEFIT TEACHERS

Teachers benefit from gamified learning as Math Master's keeps students engaged, making classroom management easier while also improving motivation and retention. By turning lessons into interactive, rewarding experiences rather than routine worksheets, students can approach math with a enthusiastic, learning driven approach.

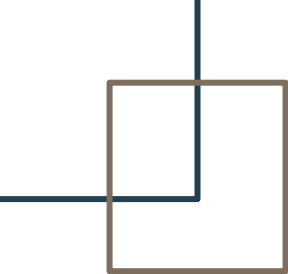

NEW AND IMPROVED

Math Masters uses interactive games to motivate students. Our application gives instant feedback if an answer is wrong and aids in students' math accuracy. Additionally, students are able to learn independently and teachers can identify topics that they may struggle with. Math Masters provides a cumulative bank of games that keeps students motivated.

HOW WE CREATED THESE GAMES AND HOW THEY ARE USED.

Math masters was created during the summer of 2024, and as a group we have put over 600 hours into our application. Math Masters provides a combination of games ranging from Kahoot, Quizizz, and Factiles. Each module contains two games for each subunit and a group jeopardy encompassing the whole module.

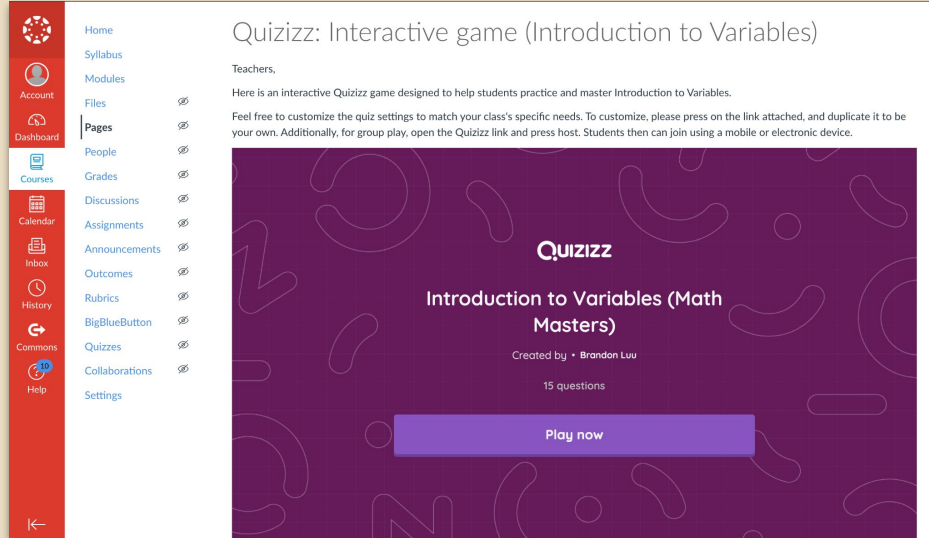

Transforming Quadratic Functions	✓	⋮
📄 Kahoot: Transforming quadratic functions	✓	⋮
📄 Quizizz: Interactive Game (Transforming Quadratic Functions)	✓	⋮
Unit Game! (Group Review Game)	✓	⋮
📄 For Teachers, Unit 14 Jeopardy!	✓	⋮
▼ Quest 15: Irrational Numbers	✓ ▼ +	⋮
Irrational Numbers	✓	⋮
📄 Kahoot: Irrational Numbers	✓	⋮
📄 Quizizz: Interactive Game (Irrational Numbers)	✓	⋮

Each unit is split into its
relative subtopics with two
games per subtopic

This formatting makes it easy
to understand for the
user/educator

SUPPORTED APPS

Quizizz

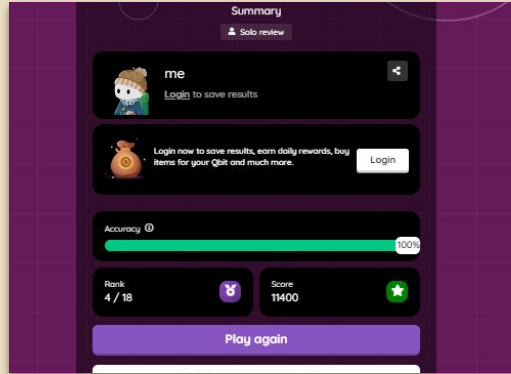

Kahoot

Factile

SUPPORTED APP: QUIZIZZ

- In each subunit, there is a Quizizz game in connection with the material
- The Quizizz leaderboard is updated in real time as students play through the game
- There are memes after each question, making it engaging and fun

SUPPORTED APP: KAHOOT

- In our Canvas Course our interactive games made on Kahoot are linked under each module's sub assignment.
- For each game, there are numerous different game modes students can choose from.
- If the students do not choose to play a game, they will have alternative options like flash cards, or practice tests to play.
- Along with solo games, teachers can host a larger group game where there is a live leaderboard where students can compete.

SUPPORTED APP: FACTILE (JEOPARDY)

factile

- At the end of each unit, one big jeopardy game reinforces learning
- A fun way to promote teamwork and competition
- Control the timer!
